With a keen eye for detail and a passion for tackling complex problems, I strive to deliver high-quality solutions in every project. I embrace new challenges and opportunities to learn and enhance my skills. My work ethic and natural curiosity drive me to keep up with the latest developments in technology.

Experience

Full-stack developer - Luul Solutions Ltd

Mar 2021 - Present

At Luul Solutions, I delivered innovative technological solutions that transformed clients' businesses.

- Resolved issues and enhanced user experience using React, Redux, Node.js, Express, and SQL database technologies.
- Employed REST APIs and Redux to implement features that managed states, significantly enhancing functionality and improving user experience.
- Wrote automated tests with Jest and Cypress to ensure reliable and efficient solutions.
- Collaborated with a cohesive team to successfully deliver cutting-edge solutions that consistently exceeded client expectations.
- Utilized Styled Components to create visually appealing and intuitive interfaces.
- Demonstrated strong problem-solving skills, attention to detail, and commitment to quality assurance.

LulPOS:

I made a significant contributions to the development of LulPOS, a revolutionary point-of-sale system designed to optimize restaurant operations and enhance efficiency for our clients. My primary focus was on developing the web interface component of the system, working on the feature that allowed for the creation of products, along with their associated variants and attributes. In addition to designing and implementing the stepper, I wrote the associated integration tests to ensure its functionality and compatibility with the system. Through this, I demonstrated my ability to deliver robust solutions and acquired extensive experience in full-stack web development.

Covid19 passport system:

Another project in which I contributed significantly to was the development of a Covid19 Passport system, building the system's landing page and effectively resolving any encountered bugs via a ticketing system. The project demanded exceptional attention to detail, as well as expertise in web development and the ability to track bugs effectively. Through my work on this project, I gained extensive experience in developing web applications for critical purposes, demonstrating my proficiency and dedication to delivering high-quality solutions.

Academic Qualifications:

- A-level Maths
- A-level Computer Science
- A-level Physics

Education

Fast-Track Academy

Feb 2020 - Jan 2021

During my training, I gained expertise in building highly interactive and user-friendly web applications using React.js and advanced JavaScript concepts. Key skills include:

- Leveraging React Props, States, and Class Component Lifecycle to create dynamic and interactive UIs
- Mastering React Handling Events & React Forms for rich user experiences
- Applying Redux for predictable and robust state management
- Utilizing React Hooks for enhanced performance and functionality
- Developing RESTful APIs using Fetch API and Axios for seamless communication
- Applying best practices in front-end development, using Bootstrap and other popular frameworks
